

NDUKWE MICHAEL OKORIE JUNIOR

Aspiring Cybersecurity Analyst | Ethical Hacking & Network Technology Student

Email: micndukojun@gmail.com | Phone: 08118526684 | Location: Nigeria | Portfolio: <https://nmcipher.github.io> | GitHub: <https://github.com/nmcipher>

PROFESSIONAL SUMMARY

Motivated Cybersecurity and Network Technology student with strong interest in ethical hacking, penetration testing, networking, Linux systems, front-end web design, and secure digital solutions. I learn by building real projects, troubleshooting technical problems, and improving systems to make them more secure, reliable, and user-friendly. I am focused on growing practical technical skills and applying them to real-world cybersecurity and technology challenges.

EDUCATION

Lincoln University College

Cybersecurity and Network Technology - Year 2 | Expected Graduation: 2028

CERTIFICATION

Front-End Web Design

TECHNICAL SKILLS

Cybersecurity	Ethical hacking, penetration testing concepts, threat identification, phishing, spoofing, malware, DDoS, man-in-the-middle attack concepts, security best practices
Networking	Computer networking basics, IP addressing concepts, network troubleshooting, network attacks and prevention methods
Linux & Systems	Linux installation and setup, Pop!_OS, Kali Linux familiarity, terminal usage, basic commands, system troubleshooting
Web Development	HTML, CSS, JavaScript basics, front-end web design, responsive portfolio development, GitHub Pages deployment
Tools & Platforms	VS Code, Git, GitHub, Linux terminal, XAMPP/local server setup

PROJECTS

NMCipher Portfolio Website

- Built and customized a cybersecurity-themed personal portfolio website.
- Created a professional online identity using the brand name NMCipher and an NM logo.
- Deployed the portfolio using GitHub Pages.

Real Estate Website Project

- Worked on a real estate website with user dashboard and administrative features.
- Practiced local hosting using XAMPP/localhost and handled styling, routing, and deployment issues.
- Improved project structure and troubleshooting workflow.

Linux OS / Server Setup Practical Project

- Practiced Linux installation, basic setup, command-line navigation, and file operations.
- Prepared technical documentation based on Linux server and operating system setup.

Cybersecurity Presentation Projects

- Prepared presentation materials on malware, phishing, spoofing, DDoS, and man-in-the-middle attacks.
- Researched attack methods, network impacts, prevention, and mitigation strategies.

EXPERIENCE

No formal work experience yet. Open to internship, SIWES placement, entry-level IT support, networking, front-end web design, and cybersecurity learning opportunities.

SOFT SKILLS

Problem-solving | Fast learning | Critical thinking | Creativity | Attention to detail | Teamwork | Communication | Project organization

INTERESTS

Cybersecurity | Ethical hacking | Penetration testing | Network security | Linux systems | Web development | Secure digital solutions
